

OTTO KAFKA

Founder · CTO · Full Stack Engineer

mrottokafka@gmail.com · ottokafka.github.io · linkedin.com/in/ottokafka

SUMMARY

Founder of Little AI Labs and former CTO with 9+ years building high-performance systems at petabyte scale. Expertise in AI/LLMs, cybersecurity (SIEM/EDR), and FinTech. Proven track record leading engineering teams, hiring, and taking products from prototype to market.

EXPERIENCE

Founder

August 2026 — Present

Little AI Labs · United States · On-site

- Drive the company's vision, technology, and business growth as Founder & CEO.
- Translate deep industry insights from my co-founder into a robust, scalable, market-ready AI product.
- Lead all strategic, technical, and commercial aspects of the venture, from concept and prototype development to customer acquisition and fundraising.
- Primary architect of the product's technical strategy and public face of the company to investors, partners, and clients.

Chief Technology Officer

June 2020 — October 2026

Malaysian startups · Full-time

- Led development of SIEM and EDR solutions, integrating machine learning and Large Language Models for advanced threat detection across Windows/Linux servers and FortiGate routers.
- Engineered high-performance systems using Python, Golang, and C++ to process petabyte-scale data, ensuring scalable real-time monitoring.
- Automated security alerts and incident response workflows with scripting, enhancing operational efficiency.
- Applied threat modeling, secure coding, and network security expertise to strengthen system defenses.
- Mentored junior developers and led hiring, balancing 80% coding and 20% management responsibilities.

Tech Content Creator

June 2020 — Present

YouTube

- Coding tutorials — front-end: Flutter for iOS, Android, Web, and Desktop.
- Back-end: Node.js and Go.

Full Stack Developer

January 2019 — June 2020

WaykiChain 维基链 · Shenzhen, China · Full-time

- Developed and maintained backend APIs utilizing Node.js.
- Collaborated with test engineers to create and execute Python test scripts for stress and general testing.

- Built and improved software in C++, Python, JavaScript, and Golang, using Docker, Ubuntu Server, Unix, Git, and Bash/Shell to streamline development.
- Updated developer documentation and streamlined developer tools to improve efficiency.
- Tech marketing: worked with the Marketing team on targeted campaigns; organized and led technical conferences and hackathons in South Korea, Serbia, Montenegro, and Japan; facilitated developer education forums.

Software Developer

July 2017 — July 2019

Nebulas.io · Beijing, China

- Updated backend APIs with Node.js.
- Updated developer documentation.
- Languages & frameworks: JavaScript / Node.js, React.js, Python.

SKILLS

Languages: Python, Golang, C++, Node.js, JavaScript

Front-end: React, Redux, Flutter, HTML/CSS

Infrastructure: PostgreSQL, Linux, GPU Clustering, Docker

Domains: SIEM/EDR, ML/LLMs, Cybersecurity, FinTech, AdTech

LANGUAGES

English (Native) · Chinese (Professional Working Proficiency)
